

Alera Group covers
Regenexx under
your health plan

What is Regenexx?

Regenexx uses your body's natural healing agents to replace the need for up to 70% of elective orthopedic surgeries by using your stem cells and blood platelets to treat your damaged bone, cartilage, muscle, tendon, and ligament tissues.

Am I a candidate for a **Regenexx** procedure?

Are you a candidate?

Regenexx procedures treat a broad range of chronic and acute orthopedic injuries. Whether you suffer from the lingering aches and pains often associated with aging or a tear or sprain due to activity, Regenexx may be able to help return you to full function without invasive surgery. Speak with your Alera Group Regenexx patient liaison to learn more.

The procedure experience

Regenexx procedures are injection-based, outpatient procedures. On procedure days, blood and/or stem-cells are collected in the morning, processed in our on-site lab, and reinjected under image-guidance in the afternoon. Most patients describe only moderate discomfort, and patients are encouraged to re-engage in activity within a week following the procedure.

Scheduling an evaluation

Our dedicated patient liaisons understand Alera Group's benefits and will guide you through the process of finding the clinic nearest to you and scheduling your evaluation. No physician referral is needed to schedule a Regenexx evaluation and phone evaluations are available for patients who have recent imaging and do not live close to a clinic location.

After a thorough evaluation by a Regenexx physician, you will be provided with a candidacy rating and treatment plan
